Hi, I'm Kabileswaran Krishna Kumar from 20SH07.

I'm truly honoured to receive the Elizabeth Poey Inspirational and Courage award. Having been a student here for 6 years, I never thought I'd be here one day, receiving this College Day award.

I'd like to thank my teammates Bharagth, Amirthaa and Sindhura. I'd also like to sincerely thank Mr Terence Yap, our teacher-in-charge. Of course, this project would not have been possible without our Partners - Engineering Good, Google, and SG Enable.

This project was truly an eye-opener for me, because it showed me the possible impact that technology, no matter how simple, can have on the community. It has also shown me that it is what we do for the community that matters, in the larger scheme of things.

This project also means a lot to me personally, because having been here for 6 years, I consider this to be my legacy in NJ, and I am sure that it will pave the way for more knowledge-based VIA projects in the future. But I won't stop here.

After the 'A' Levels, I plan to continue working on the project with my teammates, to further improve the project so that we can positively impact more people in the community.

To my fellow NJCians, follow your heart, put in the work, and you'll get to where you're meant to be. Lastly, I'm grateful to NJC for providing me with this opportunity to be a part of something bigger than myself, and I will work to continue proving myself worthy of this award. Thank you!
